

bollé.

W I N T E R W O R K B O O K

2 0 1 9 - 2 0 2 0

A skier in a red jacket and black helmet is captured in a dynamic pose, leaning into a turn on a snowy slope. The skier is wearing a red jacket with blue accents and blue pants. The background is a blurred forest of evergreen trees. The overall scene is bright and energetic, with snow being kicked up by the skier's movement.

BOLLE RESEARCH & DEVELOPMENT

HIGH PERFORMANCE SKI HELMET

Bollé is proud to introduce our newest ski visor helmet: V-LINE CARBON. Being one of the leaders in the visor segment, we put all our efforts to create a new helmet synonym of performance and elegance. Attention to detail, optimized ventilation, photochromic visor, and best-in-class head protection solutions result in a unique visor helmet with great vision and style.

HIGH QUALITY MATERIALS

Using carbon material in our helmets ensures maximum protection for our users and a touch of inimitable aesthetic.

AVID PROGRESSIVE EPS

Our freeride helmets include AVID Progressive EPS technology, bringing a higher level of protection against a wider range of impacts.

ONEPIECE FIT

Our helmets are designed to fit perfectly with our goggle range, with simple yet progressive features to never bother about your gear.

BOLLÉ DESIGN & ENGINEERING LAB

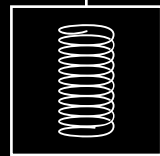

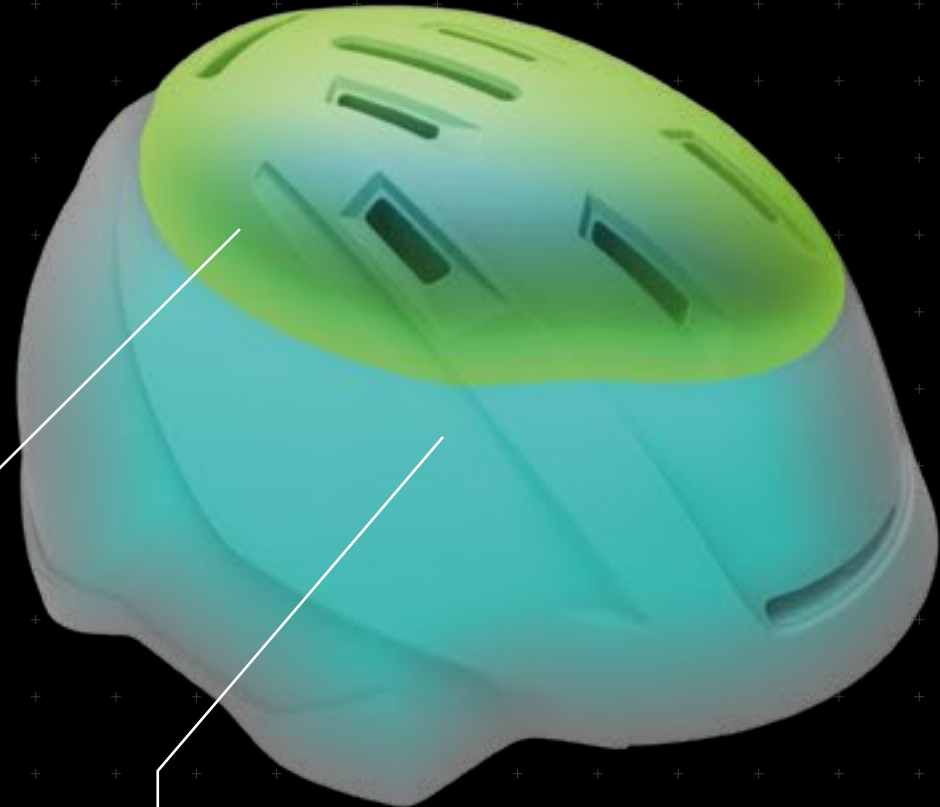

Bollé's inhouse industrial design and engineering team develop helmets and eyewear using a variety of tools. Sculpting forms by hand and on the computer allows Bollé to prototype helmets and eyewear inhouse using state-of-the art 3D printers. Impact testing helps us to improve our development and produce safe helmets.

AVID PROGRESSIVE EPS

Creating helmets that perform in all types of collision requires getting the details exactly right. This is why Bollé Research & Development team has developed a technology bringing ultimate protection to your head in every type of impact situation.

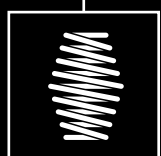

SHOCK ABSORPTION

We observed that the density of EPS had a consequence on its protection efficiency when it came to shock absorption. Some densities are optimized for one type of impacts, but bad at another.

LOW DENSITY

Absorbs low energy impacts
Bottoms out in big impacts

HIGH DENSITY

Absorbs high energy impacts
Does not compress in small impacts

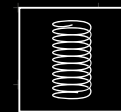

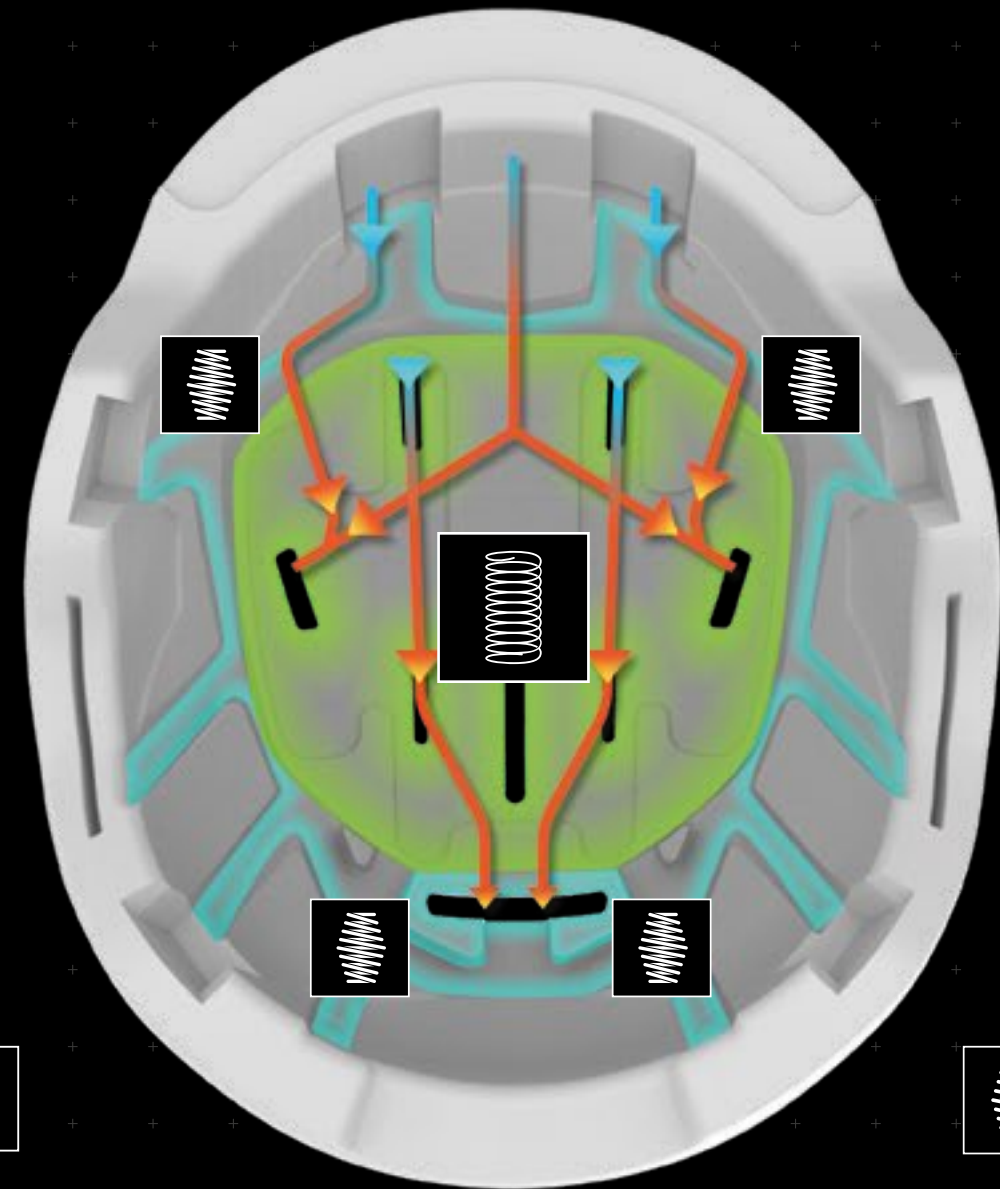

Using high density EPS ensures high energy impacts are effectively absorbed. Low density EPS, however, provides superior performance in small to medium energy impacts. Bollé helmets with the AVID Progressive technology combines high density EPS in the main structure with a low density EPS inner insert, providing more protection in a wider range of impact situations.

VENTILATION

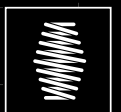

The combination of materials is also optimized with interior ventilation channels that virtually decrease density without compromising the ability to provide protection from big hits, in addition to providing excellent airflow.

The result is a lighter, more comfortable helmet with superior performance for the full range of impacts.

LOW DENSITY FOAM

Optimum absorption at medium impact energy, may compress completely in high energy impacts

HIGH DENSITY FOAM

Incomplete compression at low impact energy, optimum absorption at high impact energy

VENTILATION

CHANNELS WHICH VIRTUALLY DECREASE DENSITY

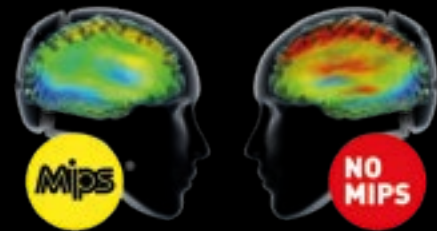

MIPS TECHNOLOGY

MULTI-DIRECTIONAL IMPACT
PROTECTION SYSTEM

**MIPS ADDS MORE
PROTECTION AGAINST
ROTATIONAL MOTION**

MIPS is a revolutionary technology that lets the helmet slide relative to the head, adding more protection against rotational motion to the brain caused by angled impacts. Because keeping you safe in every condition is our priority.

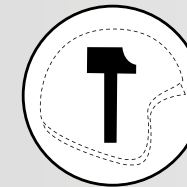

■■■■■■■■■■ STRAIN LEVEL ■■■■■■■■■■

■ = THE MORE RED THE MORE STRAIN

This simulation illustrates strain in the brain from a similar angled impact when the user is wearing a helmet without MIPS and a helmet with MIPS.

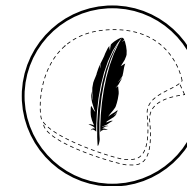

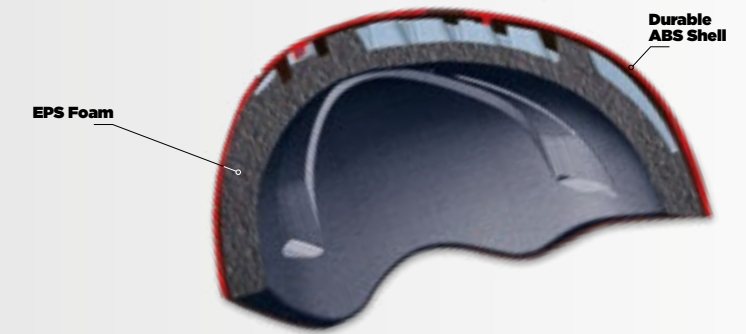

SHELL CONSTRUCTION

For helmets, getting it right in terms of construction techniques and proper ventilation can make all the difference. That's why bollé helmets are designed from the ground up for all personal preferences and performance objectives.

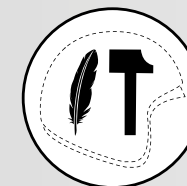

INJECTED ABS

ABS injection technology guarantees solid resistance and high capacity shock absorption, providing more robust structure.

IN-MOLD CONSTRUCTION

In-Mold construction molds the foam liner into a thin polycarbonate shell, creating lightweight and efficient protection for your head.

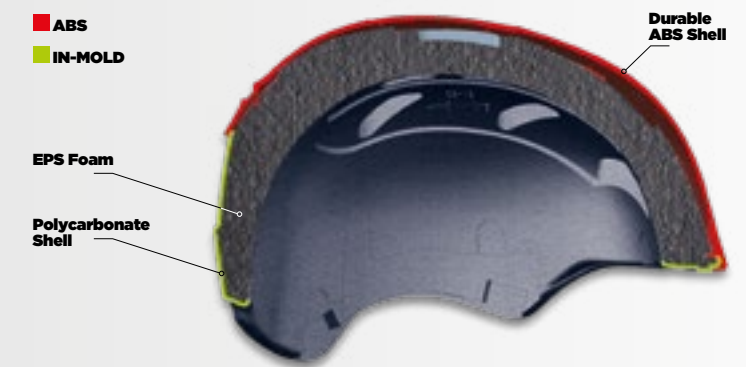

HYBRID SHELL

The right material in the right place:

- ABS shell on the top for toughness and penetration protection.
- In-mold design on the lower portion for weight reduction and style.

Bollé® hybrid shell construction synergizes the key features and benefits of In-mold and ABS shell technologies.

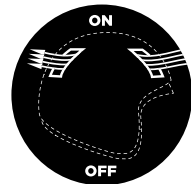

HELMET TECHNOLOGIES

360°
FIT SYSTEM

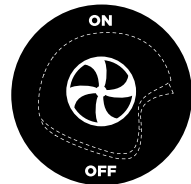

BOA®

Engineered to push performance further, the Boa® Fit System is a 360° fit system providing micro-adjustability for fully customized comfort and unmatched stability. Dial in your perfect fit, stay in the moment and ride with comfort with Boa®. **Available on Instinct only.**

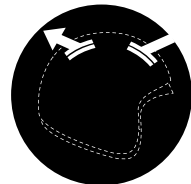

AIR EXTRACTOR

Venting holes provide constant air circulation. Cool air comes in from the front and extracts hot air at the back in order to keep your head just at the right temperature in any condition.

ADJUSTABLE VENTILATION

The adjustable ventilation system is easy to use and enables you to control the amount of air coming in for maximized comfort.

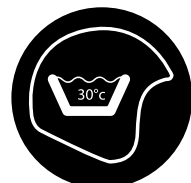

INTEGRATED VENTILATION

Openings at strategic points on the helmet ensure constant airflow inside.

CLICK-TO-FIT™ SYSTEM

Our Click-To-Fit™ system allows you to fine tune the fit of your helmet easily and quickly. Our rubberized adjustment wheel lets you tighten or loosen the helmet effortlessly, even with your gloves on!

DETACHABLE LINING

Most Bollé® helmets feature detachable and washable inner lining.

REMOVABLE EARPADS

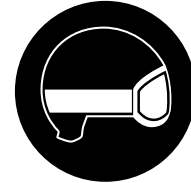

Designed to be comfortable and warm, while still allowing you to hear clearly. Helmet ear pads can be removed for washing.

AUDIO KIT

Our audio kit system offers great stereo sound with a volume dial for quick and simple sound control. Super thin speakers are inserted directly into Bollé® earpads so you can't lose them.

*Audio kit sold separately

PERFECT GOGGLE / HELMET INTEGRATION

Bollé® helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

JUNIOR HELMETS

QUIZ VIZOR
QUIZ
B-LIEVE
B-FREE

HELMET: Quickster
GOGGLES: Rocket

RETAINER CLIP

Made in rubber, the retainer clip keeps the goggle strap in place. No more risk for your kids to loose their goggles.

CLICK-TO-FIT™ SYSTEM

Our Click-To-Fit™ system allows you to fine tune the fit of your helmet easily and quickly. Our rubberized adjustment wheel lets you tighten or loosen the helmet effortlessly, even with your gloves on!

INTEGRATED VENTILATION

Openings at strategic points on the helmet ensure constant airflow inside.

SIZES: FROM 49 TO 55 CM

QUIZ VIZOR

The very first Junior visor helmet from Bolle: we took all of the great technologies of QUIZ and then added a visor to create the exciting QUIZ VIZOR. The durable and tough ABS hard shell sits on top of an EPS liner to provide good protection against impacts and sharp objects. The Air Extractor vents keep the head cool and the Click-To-Fit™ system provides great comfort, adjusting the size as kids grow.

 CAT.2

FLAT ZONE

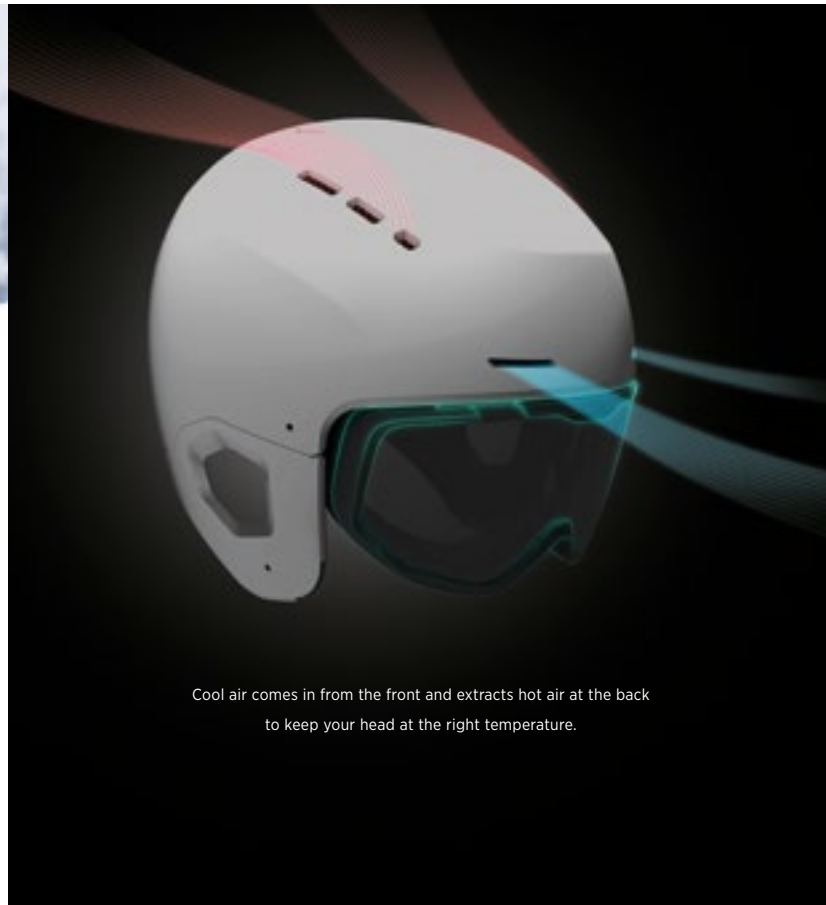

A flat zone has been designed to prevent slipping, when the goggle sets on the forehead.

LENS HEIGHT

Lens height has been increased to avoid the gap between the helmet and the goggle, ensuring a perfect fit.

ONEPIECE FIT

Our experience of developing kids helmets and goggles led us to create QUIZ helmet and ROCKET goggles in order to enhance our kids' experience on snow. Kids often experience the issue of having a gap between their helmet and goggles on the forehead zone, because both products do not offer the correct fit. Based on this evidence, we have developed a helmet with simple yet progressive features to eliminate this issue, and allow our children to enjoy their ski day in total safety and with comfort.

Cool air comes in from the front and extracts hot air at the back to keep your head at the right temperature.

SIZES: FROM 49 TO 55 CM

QUIZ

Our most robust helmet for kids is a great choice for fearless youths. The durable and tough ABS hard shell sits on top of an EPS liner to provide good protection against impacts and sharp objects. The Air Extractor vents keep the head cool and the Click-To-Fit™ system provides great comfort, adjusting the size as kids grow.

HIGH MOUNTAIN LENSES

Specially developed for high-altitude use, the Bollé 100 Gun lens offers Cat.4 protection, eliminating distracting glare. By filtering 95% of visible light and amplifying color contrast, it delivers better vision on the snow. Take a moment to admire the view on top of the world with GRAPHITE!

HYBRID STYLE

Whether you are ski-touring or hanging out with friends in the city, COBALT is the perfect accessory combining style and performance.

GREAT SIDE PROTECTION

Injected and vented side shields protect your eyes during high-intensity mountain activities. Just clip them out at the end of the day and get into urban style mode with your friends.

ON TOP OF PERFORMANCE

The new must-have item on your next expedition check list. GRAPHITE is the definition of Bollé's vision about mountaineering sunglasses. Ideal for medium to large faces, they adapt to any weather conditions thanks to their magnetic & removable side shields. Also available with Bollé's cutting-edge lens technology Phantom, this model can be summarized in 3 words: lightweight, technical, high-protection.

PURE HERITAGE

True to Bollé's heritage, COBALT's design takes inspiration from vintage mountaineering sunglasses while offering a very modern look with sharp edges and premium finishing such as its metal bar and shield design. To offer perfect protection in the mountain's extreme environment, COBALT benefits from removable injected side shields to protect you from distracting sun reflections, and is also available with Bollé cutting-edge Phantom lens technology.

FIT: LARGE • 8BASE 63/47/17/116

GRAPHITE

Bollé brings mountaineering back to the range. Go beyond your limits with GRAPHITE and reach new heights. Ergonomy, ventilation, protection, this glacier style has all it takes to endure the most extreme experiences without any compromise.
