CEBE  
PURE ADRENALINE

# HISTORY OF CÉBÉ

**1892**

Birth of the brand in the Jura mountains.  
Cébé is a **pioneer** in the **manufacture** of sport sunglasses.

**End of 19th century:**

Carl Benz, orders Cébé sunglasses to wear when driving his sport car.

**1940**

The company extended its activities to the **manufacture of ski helmets and goggles**.

**1970**

Walter Cecchinel, a famous French mountaineer, has left an indelible mark in the brand's history by inspiring a range of **specialized sunglasses for glacier**.

**2013**

Cébé is the **Gold Winner** of the prestigious **Ispo Award** with its revolutionary S'Track style.

**TODAY**

Cébé invites new generations to reveal the pioneering part in each of them in order to push their limits of their sport practice

## NXT®

### OPTICAL CLARITY

NXT® is one of the best lenses in terms of optical clarity, impact resistance and lightness (the specific gravity<sup>(1)</sup> of a NXT® lens is 1.11g/cm<sup>3</sup> compared to 2.53g/cm<sup>3</sup> for a mineral lens). It also gives more reactivity and higher amplitude to photochromic treatment.

(1) Specific gravity describes the density of a lens material by comparing its density to the density of water.

PHOTOCHROMIC

**NXT® VARIO PERFO**  
Amber Flash Mirror **CAT.1-3**

VLT 73% - 16%

## POLYCARBONATE

### IMPACT RESISTANT

20 times more impact resistant than glass and substantially lighter (the specific gravity<sup>(1)</sup> of a polycarbonate lens is 1.22g/cm<sup>3</sup> compared to 2.53g/cm<sup>3</sup> for a mineral lens), polycarbonate lenses offer the best combination of protection, performance and visual comfort.

(1) Specific gravity describes the density of a lens material by comparing its density to the density of water.

# TECHNOLOGIES

SAME LENS

# PHOTOCHROMIC LENS

EXTRA FINE 400 FILM PRO 8 3422

Different light conditions call for different lens tints. Photochromic lenses function by **darkening or lightening** depending on the **ultraviolet rays** coming from the sun and so **adapt automatically to light conditions**.

IN FREERIDE, WE REGULARLY MOVE FROM A LARGE EXPANSE OF SUNKIN POWDER SNOW TO A SHADED NORTH-FACING CORRIDOR. THE PHOTOCHROMIC TECHNOLOGY ALLOWS ME TO KEEP OPTIMAL VISION WHATEVER THE CHOSEN PLAYING FIELD AND THE BRIGHTNESS. I APPRECIATE IT THE MOST WHEN I'M IN A COMPETITION, I DON'T NEED TO WONDER WHAT LENS CATEGORY I SHOULD USE, I CAN CONCENTRATE 100% ON MY PERFORMANCE! WHEN I DROP DOWN A MOUNTAIN FACE WHERE PRECISION IS THE KEY WORD AND WHERE THE SLIGHTEST MISTAKE CAN BE COSTLY, I KNOW I CAN TRUST MY EQUIPMENT AND MY VISION!

# PHOTOCHROMIC LENS

## CHOOSE YOUR LENS MATERIAL

### POLYCARBONATE

# GLOBAL LENS TECHNOLOGY

## ANTI-FOG COATING FOR A CRYSTAL-CLEAR VISION

Cébé's anti-fog coating is applied to the inside of the lens, dispersing water molecules across its surface and preventing the build-up of condensation and moisture.

## ANTI-SCRATCH COATING FOR MORE DURABILITY

Our specially formulated anti-scratch hard coating applied to the outside lens increases the lens hardness thus improving scratch and abrasion resistance. Our coating also builds a better foundation for the adhesion of mirrored coatings.

## SOS RX ADAPTER GOOD VISION WHATEVER YOUR PRESCRIPTION

The Cébé SOS RX Adapter can be easily put in place to provide the corrective vision required while maintaining the wide field of vision. It's compatible with all styles except Jerry 2.

**CBOPTIGOG**  
**Cébé SOS RX Adapter for Goggles.**

## WIDE FIELD OF VIEW SEE EVERYTHING AROUND YOU

The wide field of vision ensures maximum peripheral vision both horizontal and vertically allowing you to observe and enjoy everything around you.

# GLOBAL LENS TECHNOLOGY

## SINGLE LENS PERFECT VISIBILITY

Made of polycarbonate, Cébé's single lenses are very impact resistant and allow good ventilation.

## DOUBLE LENS PERFECT VISIBILITY

The PC and AC double lens construction from Cébé offers perfect visibility eliminating any distortion and fog.

## VENTILATED LENS AVOID ANY RISK OF FOGGING

Openings on the external lens allow an optimized air circulation between the two lenses and inside the goggle, avoiding any risk of fogging and maintaining a better thermic regulation. Foam on the upper and lower parts of the goggle allow these airflows to circulate while preventing snow and moisture from infiltrating.

## CYLINDRICAL VS SPHERICAL IMPROVED FIELD OF VIEW

Cylindrical lenses are designed on a base curvature on the X axis (horizontal), and thus follow the curve of the face offering a good field of view. On the other hand, spherical lenses are designed on both X and Y axis (horizontal and vertically) which gives a more rounded shape and a better quality of vision by reducing optical distortions and maximizing vertical and horizontal peripheral viewing angles.

**FRAME  
TECHNOLOGY**

# TECHNOLOGIES

## MAGNETIC TECHNOLOGY

EXTRA FINE 400 FILM PRO 8 3422

Cébé's magnetic technology allows you to **change your lenses in a flash**. Designed with **8 to 9 magnets** and sold with **2 lenses** (category 1 and category 3), the 3 goggles from the magnetic collection ensure the **best vision possible whatever the weather conditions**. The power of the magnets also guarantees a **good hold of the lens** to offer you **maximum security**.

IN THE MOUNTAINS, WEATHER CONDITIONS CHANGE VERY QUICKLY AND YOU HAVE TO BE ABLE TO ADAPT. WITH THE ICONE MAGNETIC GOGGLE I'VE FOUND THE SOLUTION! AS WELL AS BEING WELL VENTILATED AND HAVING A WIDE FIELD OF VISION, IT COMES WITH TWO LENSES, IN CATEGORY 3 AND CATEGORY 1. EASY TO SLIP INTO A BACKPACK, THE 9 MAGNETS MAKE IT EASY TO SWITCH LENSES AND THIS MEANS I CAN REACT QUICKLY, EVEN IN EXTREME CONDITIONS!

# MAGNETIC TECHNOLOGY

## DISCOVER THE 3 MAGNETIC STYLES

### 1 / ICONE

Spherical and ventilated lens featuring anti-fog and anti-scratch treatments for optimum vision!

#### TECHNICAL CHARACTERISTICS:

- + Size L
- + Spherical lens
- + Ventilated lens

PAGE 71

### 2 / EXO OTG

A revolutionary style that combines magnetic lenses and a special design for prescription glasses!

#### TECHNICAL CHARACTERISTICS:

- + Size L
- + Spherical lens
- + Compatible with prescription glasses

PAGE 95

### 3 / ATTRACTION

The reference with its face-hugging fit and extra-large field of view!

#### TECHNICAL CHARACTERISTICS:

- + Size L
- + Cylindrical lens

PAGE 80

# FRAME TECHNOLOGY

## OVER THE GLASSES WEARING PRESCRIPTION GLASSES WILL NO LONGER BE A PROBLEM

Our OTG range offers wider goggles and strategic cuts into the inner foam and frame to perfectly fit prescription glasses. Cébé also added a magnetic OTG style to the range with a thinner nose to facilitate the positioning of glasses, even with the goggle already positioned on the face.

## ARTICULATED OUTRIGGERS BETTER HELMET INTEGRATION

The articulated outriggers provide better helmet integration and prevent deformation of frame and lens for more comfort and optimized vision.

## 3 DENSITY FOAM SOFT TOUCH FOR MAXIMUM COMFORT

Overlapping of dual density foam with a fleece coating to ensure a better retention and more comfort.

## SILICONE STRAP PERFECTLY MAINTAINS ON THE HELMET

The silicone strips inside the strap ensure better stability and good support of the goggles on the helmet.
