YCEBE
PURE ADRENALINE

HISTORY OF CÉBÉ

1892

Birth of the brand in the Jura mountains.
Cébé is a **pioneer** in the **manufacture** of sport sunglasses.

End of 19th century:

Carl Benz, orders Cébé sunglasses to wear when driving his sport car.

1940

The company extended its activities to the **manufacture of ski helmets and goggles**.

1970

Walter Cecchinel, a famous french mountaineer, has left an indelible mark in the brand's history by inspiring a range of **specialized sunglasses for glacier**.

2013

Cébé is the **Gold Winner** of the prestigious **Ispo Award** with its revolutionary S'Track style.

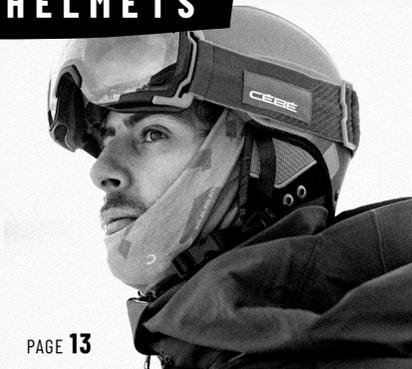

TODAY

Cébé invites new generations to reveal the pioneering part in each of them in order to push their limits of their sport practice

HELMETS

HELMET

TECHNOLOGY

SHELL CONSTRUCTION

ABS CONSTRUCTION

HIGH CAPACITY OF SHOCK ABSORPTION

The ABS construction is made from a single injection to provide maximum resistance to time and impacts. Made of ABS beads this construction prevents any risk of deformation.

ABS TRI-ZONE

A UNIQUE CONSTRUCTION FOR MAXIMUM PROTECTION

This 3-material construction revolutionizes the concept of protection and comfort. It comprises:

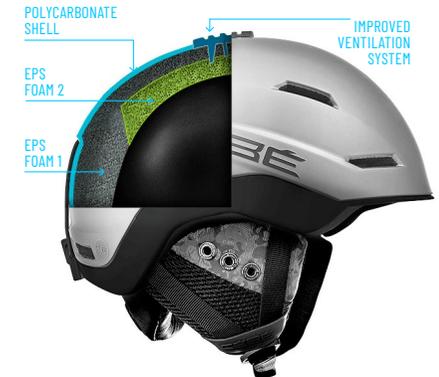

- an ABS shell for maximum resistance
- rigid EPS foam for good shock absorption
- EPP foam, a more lightweight and elastic material which avoids any risk of deformation, making this helmet one of the lightest on the market.

IN-MOLD CONSTRUCTION

COMFORT AND LIGHTNESS

Ultra-light construction made from an EPS injection and an ultra-resistant polycarbonate shell. The In-Mold construction has become the reference in terms of comfort and being lightweight.

DOUBLE IN-MOLD CONSTRUCTION

LIGHTNESS AND INCREASED AIRFLOW

The double In-Mold construction guarantees ultra-lightweight helmets thanks to the overlapping of two In-Mold structures. It also helps to offer more ventilated products as adjustable ventilation is easier to implement.

SHELL CONSTRUCTION

HYBRID CONSTRUCTION

PERFECT COMBINATION OF LIGHTNESS AND RESISTANCE

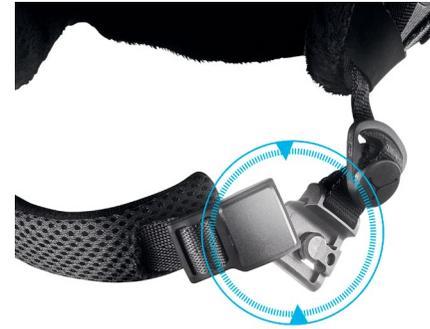

Cébé's hybrid construction represents the perfect combination of In-Mold technology and injected ABS. The ABS shell, at the top of the helmet ensures good impact resistance and protection while the In-Mold construction, on the lower part, is a guarantee of having a lightweight and comfortable product.

DETACHABLE AND WASHABLE LINING

COMFORT AND HYGIENE

In the interests of comfort and hygiene, most of our helmets have removable and washable inner padding. For increased breathability, most linings have 3D mesh panels that allow heat to escape more easily.

FIDLOCK SYSTEM

QUICK RELEASE YOUR MAGNETIC BUCKLE

Fidlock is revolutionising the traditional helmet buckle. With the Fidlock snap, you can close and open automatically your buckle thanks to a magnetic system.

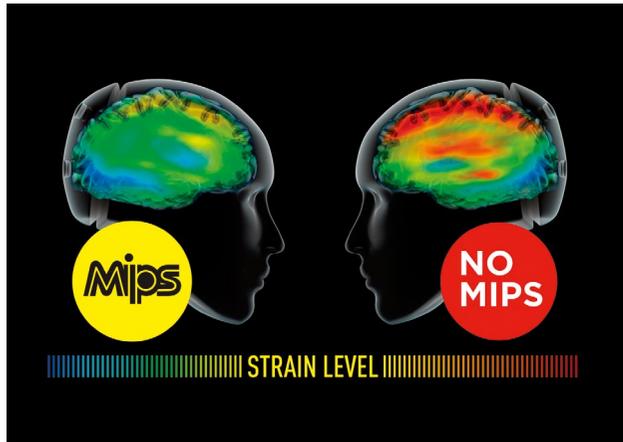

REMOVABLE EAR PADS

A FREESTYLER LOOK

Removable and washable earpads.

SAFETY

MIPS® BRAIN PROTECTION SYSTEM

KEEP YOUR BRAIN SAFE

MIPS® technology is designed to add protection against rotational motion transmitted to the brain from angled impacts to the head. Indeed, the low friction layer allows the head to move 10 to 15mm, in all directions, inside the helmet, and so redirects energies and forces otherwise transmitted to the brain.

RECCO®

BE SEARCHABLE, BE SAFE

The RECCO® Rescue Reflector, incorporated in our helmets, helps professional rescuers locate you in the event of an avalanche accident or if you are lost outdoors. The detector used by rescuers emits a directional signal and the RECCO® reflector worn by the user bounces the signal back to show them the way.

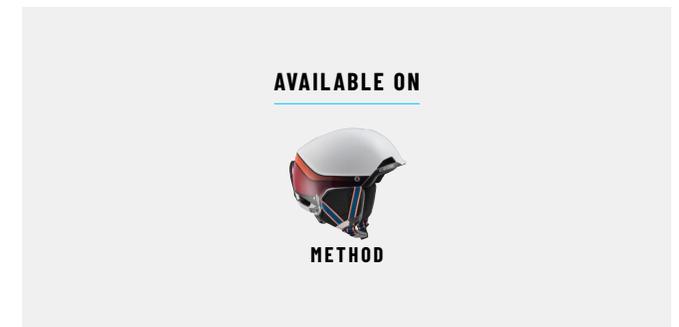

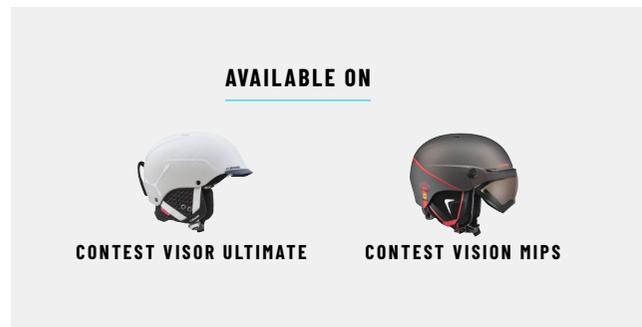

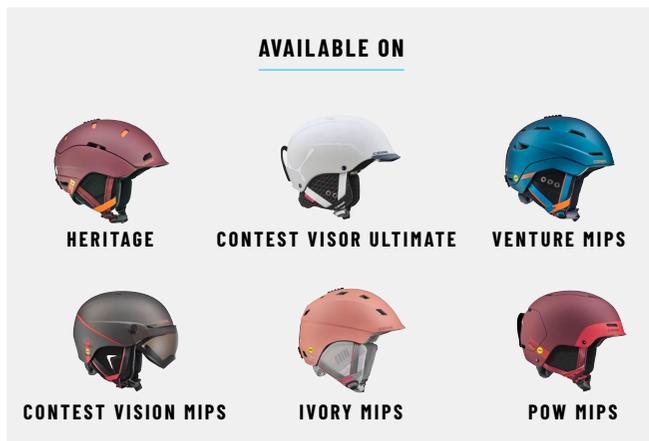

RECCO® TECHNOLOGY IS NOT A SUBSTITUTE FOR AN AVALANCHE TRANSCIEVER.

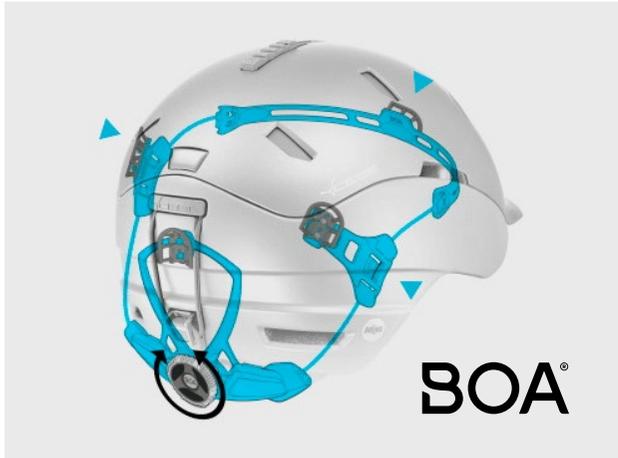

EVA FOAM

SHOCK ABSORPTION ZONES

Placed at strategic points in the helmet (front, temples and rear ; zones where impacts mostly occur), EVA inserts deliver maximum shock absorption to reduce strain to the brain upon impact.

FIT

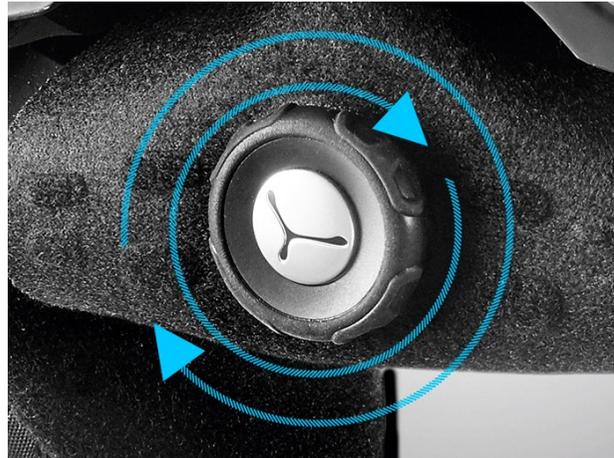

BOA® FIT SYSTEM

GET BETTER PROTECTION AND ALL-DAY COMFORT

Cébé also offers helmets that feature the most advanced technology in terms of fine tuning the fit.

The Boa® Fit System, seamlessly incorporated into our helmets, provides a customized fit thanks to its 360°-wheel system which allows micro-adjustments, be they vertical, frontal or horizontal. Your helmet sits snugly on your head with no pressure points, and getting it on and off is quick and easy.

FINE TUNING FIT SYSTEM

FIT VERSATILITY

The F.T.F. (Fine Tuning Fit) provides added versatility to the helmet. The fine adjustment allows a tighter fit for perfect stability during even the most extreme activities.

When not skiing, a simple readjustment will release the system for a more relaxing fit.

CÉBÉ UNIVERSAL FIT

REVIEWED FIT, MORE PRECISE AND ADJUSTABLE

Cébé Universal Fit (CUF) has been created to deliver a more consistent range in terms of fit. The width of each size range is now reduced, so Cébé offers adjustable helmets to guarantee maximum stability, comfort and safety. You'll be certain to find the perfect helmet for you!

VENTILATION

ULTRA VENTING SYSTEM

MAXIMIZE THE AIRFLOW

The call of virgin slopes very often incites riders to hike uphill. And to ensure they enjoy it as much as the descent, Céb  innovates and launches its Ultra Venting System technology which allows the upper part of the helmet to be lifted at an angle of 4° and thus maximize the air flow. With the Versatile helmet, your head will be kept cool but without compromising on safety since it has a double certification for skiing and mountaineering.

ADJUSTABLE VENTING SYSTEM

CONTROL THE AIRFLOW

Adjustable, easy to use and extremely efficient, our ventilation system allows you to change the amount of air flow and expel heat even with gloves.

PASSIVE VENTING SYSTEM

KEEP YOUR HEAD COOL

C b 's passive venting system is composed of openings placed at strategic points to ensure a constant air flow, evacuating heat and avoiding cold air from entering.
