bollé®

PERFORMANCE INNOVATION SINCE 1888

Born in 1888 in France, Bollé is
the market leading solution for
eyewear and helmets.

Globally respected and worldwide
distributed, **Bollé is known as the
most advanced design and creative
sport brand**, which creates trends
and pushes industry boundaries.

Brand History

1888

A family business

Seraphin Bollé created the brand Bollé; known at this time as one of the first company to use newly developed celluloid, which becomes the basis for Bollé products during those early decades.

1950

Safety Glasses and Goggles

Safety glasses and goggles were added to the Bollé Line and strengthened our position of pioneer and most performing brand in the industry.

1960

Ski Goggles

Ski goggles were first marketed by Bollé.

2007

Ski Helmets

Launch of the first line of ski helmets. A front-line player in the winter sports landscape.

2018

PHANTOM+

Launch of the best sport lens ever.

2021

VOLT+

A revolutionary HC and polarized lens

1936

Sunglasses

The brand launches its first sunglasses and becomes quickly the pioneer of molded Nylon.

1956

Cat-eyes

Georges Bollé created the famous nylon 'cat-eyes' sunglass.

1986

Chronoshield

Launch of the iconic cycling model.

2015

Cycling Helmets

Launch of the cycling helmets line.

2020

RYFT

The most ventilated snow helmet in the market.

3 LEVELS OF PERFORMANCE

PHANTOM
LIGHT ADAPTIVE X PLATINUM

PHOTOCHROMIC

REVEAL THE INVISIBLE WITH THE BEST LENS IN THE MARKET

Searching for a competitive advantage, superior protection, or an extraordinary visual experience? We thought so. That's why we created Phantom, Bollé's first photochromic lens with phenomenal optical clarity.

VOLT+
HIGH CONTRAST ENHANCED COLOUR

HIGH CONTRAST

EXPERIENCE THE POWER OF COLOR WITH AN EXCEPTIONAL HIGH CONTRAST FILTER

To see colors like never before, you need to test colors like never before. Which is why Bollé used artificial intelligence to evaluate over 20 million color enhancement possibilities. In the end, only one formula provided an uncomparable color experience and it's so unique, it is patented. It's called Volt+ and it now establishes a whole new standard for high contrast lenses.

POLYCARBONATE

CLASSIC

A GOOD VISIBILITY WITH 100% UV PROTECTION

A standard polycarbonate lens, for good visibility and protection.

OPTION
POLARIZATION

Block light reflections for even more eye comfort

REVEAL THE INVISIBLE

The best keeps getting better

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical. Platinum represents the highest level of expertise in anti fog and anti scratch protection.

With **Phantom and Phantom+**, Bollé brings this expertise to everyone. A perfect protection with a more performing anti fog and an anti scratch that last 40% more than the standard.

LIGHTWEIGHT

NXT[™] material is close to the lightest lens material available today, at 14% lighter than polycarbonate. This allows for larger designs with fuller coverage, ultimate protection and utmost comfort.

AVAILABLE IN PRESCRIPTION

Because everyone's vision is unique, our NXT[™] lenses are available with our B-Thin Technology, suitable for 99% of prescriptions.

HIGH IMPACT RESISTANCE

NXT[™] lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT[™] is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

OPTICAL CLARITY

Made with NXT[™] material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT[™] material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

PHOTOCHROMIC PERFORMANCE

Phantom lens technology adapts to any light condition, ensuring precise visual acuity whatever the weather. The lens tint changes with the light from cat.1 to cat.3. Enhanced vision whatever the conditions.

THE + THAT MAKES THE ULTIMATE DIFFERENCE

Phantom+ combines all of our 3 technologies adding a 4th additional element: polarization. Polarized lenses are largely recognized today for their benefits in terms of blocking parasitic light reflections. So it felt right to add them to our already unbeatable lens technology to improve its level by yet another step. Equipped with Phantom+ lenses, you will be ready to take on any adventure.

HIGH CONTRAST

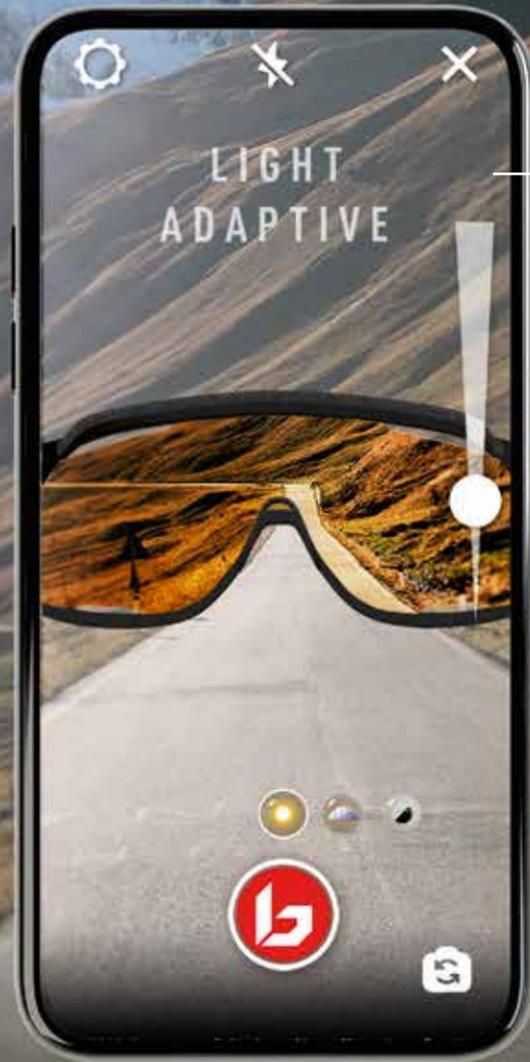

Bollé has advanced the performance of Phantom lens technology by adding a high contrast filter on its lenses. Available on all Phantom lenses, the high contrast filter boosts colors and significantly enhance your vision. Whether you are on the road or on trails, high contrast lenses will help you perceive the obstacles.

PHANTOM

NOW YOUR PHONE CAN REVEAL THE INVISIBLE

TRY ON CHRONOSHIELD

TRY OUT PHANTOM LENSES

TRY OUT OUR INSTAGRAM AUGMENTED REALITY FILTER

Reveal the invisible in your favourite sport.

PHANTOM COURT

Tennis is a sport in which visibility and reaction time are key to play the right shot at the right moment.

Phantom Court enhances contrast to highlight yellow and white colors allowing players to perfectly see the ball and the lines in every condition. Whether you play on hard, clay or grass, perform at your best with Phantom Court.

PHANTOM BROWN GUN

Golf is another sport where vision is decisive. Developed to improve contrast of green colors and to enhance depth perception, our Phantom Brown Gun lens is the ultimate lens for golfers. Clearly differentiate between greens and fairways, and elevate your game to a whole new level.

PHANTOM +

When practicing marine sport you are often exposed to strong sunlight reflection. Phantom + is the most adapted lens for these conditions offering an outstanding polarization that reduces eye fatigue by minimizing glare. Enjoy your day on the water with a phenomenal optical clarity and a constant comfort for your eyes.

PHANTOM CLEAR GREEN

Our best lenses for cyclists. From category 1 to category 3, enjoy your ride and perform at your very best with Phantom Clear Green and Phantom Vermillon Gun. Phenomenal optical clarity and additional comfort for your eyes for an unrivaled visual experience.

VOLT+ HIGH CONTRAST ENHANCED COLOUR

Revolutionary Color Enhancement

THE FIRST LENS EVER DEVELOPED WITH
ARTIFICIAL INTELLIGENCE

1. Find out which wavelengths to enhance or dampen
2. Design and develop the chemical compounds (pigments) that will absorb the right wavelengths
3. Put together the perfect blend of pigments for the transmission curve we want to achieve

Frame technology

Wearing Bollé's ultimate lenses is key to enhancing your vision of the world, yet it is not enough. At Bollé we give extra attention to details and technology while creating our frames, in order to ensure you get the most comfortable and reliable eyewear for your active life.

M

(ADJUSTABILITY + FIT + GRIP)

LIGHTWEIGHT

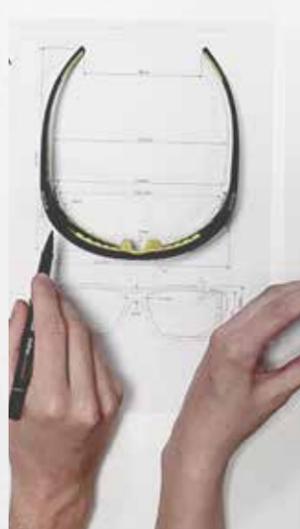

PERFECT COMFORT

E

ADJUSTABLE TEMPLES

The temples can be adjusted which offers a truly tailored fit and the ultimate in comfort.

REMOVABLE SIDE SHIELDS

Whether magnetic or mechanical, the removable side shields available on Graphite & Cobalt models offer extra side protection from sunlight in extreme conditions.

NYLON FRAMES

Bollé uses only the finest grade nylon, resulting in frames that are exceedingly strong, yet lightweight and flexible. No matter how tough the competition, these sunglasses can take it.

ADJUSTABLE NOSEPIECE

The shape and angle of the multi-plane nosepiece can be adjusted to accommodate any nose bridge for a truly custom fit. NOSE PADS: The hypoallergenic and durable nose pads can be tailored for a custom fit, giving you additional control and comfort.

INTERCHANGEABLE LENSES

Bollé helps you stay on top of your game with this interchangeable lens system. By giving you the flexibility to match the lens to the condition, this system ensures optimum performance for any condition.

(+6.00 to -8.00, cylinder to -4.00) combined power

XXL FIELD OF VIEW

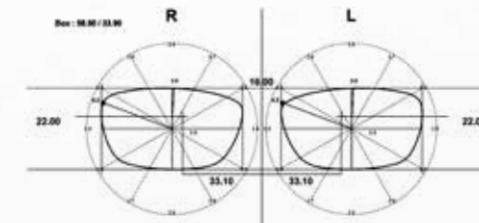

Laser cut inserts (no optical clip) for optimal lightness

Prescription programme

A FAST & INTUITIVE WEBSHOP

WHAT IS B-THIN ACTIVE DESIGN TECHNOLOGY ABOUT?

Software using the most advanced calculations is used to create customized lenses and the ultimate in lightweight products. Every prescription is reassessed to compensate for optical distortions related to the frame wrap angle. When the prescription reaches the limits of the conventional digital surfacing method, our patented algorithm calculates the best lens geometry regarding the optical area, the transition zone and reduces the edge thickness (US patent number 8,002,404). Every product is customized to the prescription, frame and wearer's facial metrics, ensuring optimum precision, comfort and frame balance for sports sunglasses.

SAFETY

BOLLÉ SPORT
SAFETY —

Our eyewear performs at the highest level of protection in sports

SAFETY EYEWEAR IS GOVERNED BY SPECIFIC STANDARDS AND BOLLÉ SPORT PROTECTIVE GOT THEM ALL.

CE

CE Marking is a manufacturer's declaration that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

EN 166

This European Standard is applicable to all types of individual eye protectors used against various dangers which may damage the eye.

ANSI Z87.1

Bollé Sport Protective meets and exceeds the high impact-resistance standards of the American National Standards Institute (ANSI) for occupational and Educational Personal Eye and Face Protection Devices.

ASTM F803-11

Our equipment for youths and adults comply with the only standard dedicated to eyewear in sports: ASTM F803-11. To pass the high-velocity impact resistance test, our eyewear must withstand the impact of different sport balls (squash, tennis, badminton, handball, football and basketball) fired at 144 km/h. Other criteria are tested: Optical Performance, UV Filtration, Refractive tolerances, Power imbalance and Prism deviation.

All Sport Protective products are "Verified as Tested for Squash", having undergone the necessary testing and being passed as suitable for squash by National Standards Association for Racket Sport Eye Protection.

Baller, Field, Playoff and League models are certified for the players of pelota or pelotari.

SHOCK

SHOCK

SHOCK

SHOCK ABSORPTION SYSTEM

BRINGS HIGH-IMPACT RESISTANCE

A revolutionary industrial process that allows two different materials to be co-injected at the same time: hard material for impact resistance and very soft material for impact absorption. This process does not use chemical bonding agents, greatly reducing the risk of allergic reactions and avoiding the possibility of heat-induced separation of components. This process also offers a very high level of durability.

STRAP SYSTEM

PROVIDES BETTER MAINTENANCE

Our innovative Click & Twist System wraps the frame securely and comfortably around your face to facilitate peak performance.

PREVENTS FOGGING

Engineered venting systems promote directional airflow across the inside surface of the lens, reducing the potential for moisture build-up and maintaining perfect vision for you.

LOCK SYSTEM

SECURE FRAME CONSTRUCTION

Ensures strong assembly of the equipment, reinforcing protection in case of a violent impact.

The perfect lenses

POLYCARBONATE HIGH-IMPACT RESISTANCE LENSES

All Sport Protective lenses are made of an extremely high-impact-resistant material. The polycarbonate is a natural UV filter, blocking over 99 percent of the UV and its light weight adds comfort to your sports equipment.

Superior anti-fog and scratch-resistant technology, used in industrial and military environments. This permanent coating makes the lens highly scratch-resistant and durably delays the appearance of fogging. Available with all our lenses.

The photochromic lens works on a molecular level to lighten and darken, giving you optimal light transmission and adaptation to any environment. From Category 0 to 3. Available with a flash mirror.

FLASH MIRROR COATING

Improve your look and your vision with a flash mirror lens. The mirror look ups your style whilst enhancing filtration.

AVAILABLE IN PRESCRIPTION

Our RX laboratories are the only official laboratories able to provide authentic certified equipment, under ANSI & EN166 standards.
