bollé

PERFORMANCE INNOVATION SINCE 1888

Born in 1888 in France, Bollé is
the market leading solution for
eyewear and helmets.

Globally respected and worldwide
distributed, **Bollé is known as the
most advanced design and creative
sport brand**, which creates trends
and pushes industry boundaries.

MIPS TECHNOLOGY

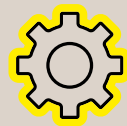

MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

PATENTED
SAFETY SYSTEM

LOW FRICTION
LAYER

FOUNDED
IN SCIENCE

THE LOW FRICTION LAYER ALLOWS A MULTI-DIRECTIONAL MOVEMENT OF 10-15 MM ON CERTAIN ANGLED IMPACTS, INTENDED TO REDUCE ROTATIONAL FORCE TO THE HEAD.

OFFICIAL SUPPLIER
B&B HOTELS p/b KTM
UCI Pro Cycling Team

Created in 2017, the B&B Hotels p/b KTM is based in Brittany, France. A region where for over a century, the heart of cycling beats strong. For training and competitions, the team is wearing the best products from Bollé's Performance range including Lightshifter and Chronoshield with our exceptionnal Phantom lenses.

«This partnership between Bollé and the B&B Hotels p/b KTM team is a great source of pride. Being part of such and iconic brand with its roots in cycling brings a lot of excitement to the team. We are all aware of Bollé's heritage and the riders know they can put their trust in its products.»

**Jérôme Pineau, Team General Manager,
B&B Hotels p/b KTM**

FAST... AND FURO!

Furo Mips is Bollé's pinnacle performance road cycling helmet. Design work on aerodynamics and ventilation and airflow testing, all inspired by the automotive industry, laid the foundation for Furo Mips. Also paired with innovative solutions on the comfort side, this helmet is packed with features designed to enhance your performance on the road.

NACA DUCT

Originally developed for aerospace, this submerged inlet provides less drag for better aerodynamics. It increases airflow inside the helmet, bringing a higher level of ventilation.

WIND SHELLS

The wind shells make your helmet more aerodynamic, while bringing extra protection during bad weather.

KAMM TAIL

The abrupt rear cut-off delivers a smaller wake that reduces drag and so improves aerodynamics.

OPTI-DOCK

With Bollé's history of designing and developing eyewear it felt only right to have a dedicated place to stow your eyewear in the FURO. Bollé's Opti-Dock storage system is a dedicated place to securely stow your eyewear.

360° INTEGRATED MIPS

A homogeneous system works better than two independent parts. Hence our decision to combine the Mips Low Friction Layer and our helmet Fit System. The result is a seamless, lighter look inside the helmet, thus providing great fit & comfort for the longest rides.

ROLL CAGE

Mostly seen on racing cars, the roll cage is a specially engineered and constructed frame built into the vehicle compartment to protect from injuries in case of a rollover. Using this principle, we decided to adapt the roll cage to our helmet construction. The roll cage reinforces the helmet, allowing the creation of huge vents to increase airflow.

FURO MIPS

SIZES : FROM 52-55 CM TO 59-62 CM

AVAILABLE TECHNOLOGIES

- MIPS Brain Protection System
- Opti-Dock
- Kamm Tail
- AVID Progressive EPS
- Anti-twist and slip divider
- 360° MIPS integrated Click-To-Fit™ System
- NACA Duct
- Roll Cage
- Removable Wind-shells

Make the wind your ally with FURO. With its sportscar-inspired design, FURO has all it takes to perform on the road: aerodynamic profile, light-weight and great cooling. Key features include the Opti-Dock and a 360° integrated MIPS fit system for maximum comfort over the longest distances. The MIPS protection system redirects energy to provide more protection against angled impacts.

Star of our eco designed range for commuters, the Halo React is a must have for the urban environment. 100% recycled lining and webbing, plastic parts in 100% eco-nylon, cap in 100% recycled fabric, water based print and cork incorporated in the EPS and shell with 100% recycled plastic are all part of our eco approach. The Halo React is a high end urban helmet above all designed for your safety. It is equipped with an integrated and USB rechargeable back and front LED system, easy to turn on and off with several lighting modes, to make sure you will be seen at night. At Bollé, when it comes to protection, we always look for the best so we combined our AVID Progressive EPS technology with MIPS, the best brain protection available. With the Halo React, you will stay safe at all times.

The same qualities that make our helmet lightweight, comfortable, and safe also make it eco-friendly. With the ECO-REACT, we are challenging the traditional way to make helmets, replacing some plastic and petroleum products by organic materials to reduce the environmental impact. We have added cork to the EPS, used recycled plastics for the shell, and natural fibers such as cotton webbing and bamboo fiber lining. It's our first step to respond to the needs of cyclists who want to pursue an active lifestyle in the city while doing their part for the planet.

THE BEST IN MTB SAFETY

TRACKDOWN is an all-mountain helmet designed to perform on any trail. This helmet features a deep coverage at the rear, the Bollé Eyewear Storage to store your sunglasses, Vent caps to protect from bad weather conditions, and a 3-position visor allowing space for goggles. If you're looking for style and comfort on the tracks, the Trackdown is the ultimate gear to wear.

ADJUSTABLE VISOR

With 3 positions, the adjustable visor adapts to all ride conditions, and means your goggles can sit on your forehead.

OPTI-DOCK

TRACKDOWN is equipped with the specific Opti-Dock storage system designed to hold a pair of sunglasses, ideal when you need to give your eyes a rest.

VENT CAPS

Plug them in and stay dry! The vent caps efficiently block off wind and rain for the wettest outings.

GREAT PROTECTION

Deep coverage to protect you in all conditions, whether you are climbing up or riding down the hill.

SUNGLASSES : Chronoshield

PLATINUM

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical. Platinum represents the highest level of expertise in anti fog and anti scratch protection.

With **Phantom and Phantom+**, Bollé brings this expertise to everyone. A perfect protection with a more performing anti fog and an anti scratch that last 40% more than the standard.

LIGHTWEIGHT

Phantom is made out of a material 14% lighter than polycarbonate. This allows for larger designs with fuller coverage, ultimate protection and utmost comfort.

AVAILABLE IN PRESCRIPTION

Because everyone's vision is unique, our Phantom lenses are available with our B-Thin Technology, suitable for 99% of prescriptions.

HIGH IMPACT RESISTANCE

Phantom lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. The material they are made out of is one of the strongest on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

OPTICAL CLARITY

Phantom lenses raise the optical clarity to a new level. They're also extremely lightweight, with a very high impact and chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

PHOTOCHROMIC PERFORMANCE

Phantom lens technology adapts to any light condition, ensuring precise visual acuity whatever the weather. The lens tint changes with the light from cat.1 to cat.3. Enhanced vision whatever the conditions.

THE + THAT MAKES THE ULTIMATE DIFFERENCE

Phantom+ combines all of our 3 technologies adding a 4th additional element: polarization. Polarized lenses are largely recognized today for their benefits in terms of blocking parasitic light reflections. So it felt right to add them to our already unbeatable lens technology to improve its level by yet another step. Equipped with Phantom+ lenses, you will be ready to take on any adventure.

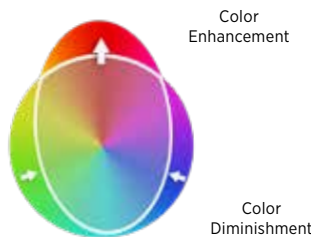

THE FIRST LENS EVER DEVELOPED WITH ARTIFICIAL INTELLIGENCE

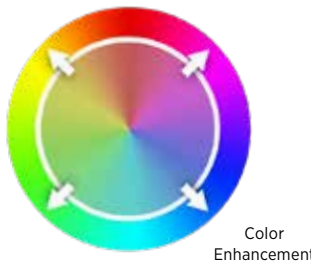

- 1 . Find out which wavelengths to enhance or dampen
- 2 . Design and develop the chemical compounds (pigments) that will absorb the right wavelengths
- 3 . Put together the perfect blend of pigments for the transmission curve we want to achieve
