PLATINUM

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical. Platinum represents the highest level of expertise in anti fog and anti scratch protection.

With Phantom, Bollé brings this expertise to everyone. A perfect protection with a more performing anti fog and an anti scratch that last 40% more than the standard.

LIGHTWEIGHT

NXT[™] material is close to the lightest lens material available today, at 14% lighter than polycarbonate. This allows for larger designs with fuller coverage, ultimate protection and utmost comfort.

AVAILABLE IN PRESCRIPTION

Because everyone's vision is unique, Phantom lenses are available on our RX-able frames, suitable for 99% of prescriptions.

HIGH IMPACT RESISTANCE

NXT[™] lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT[™] is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

OPTICAL CLARITY

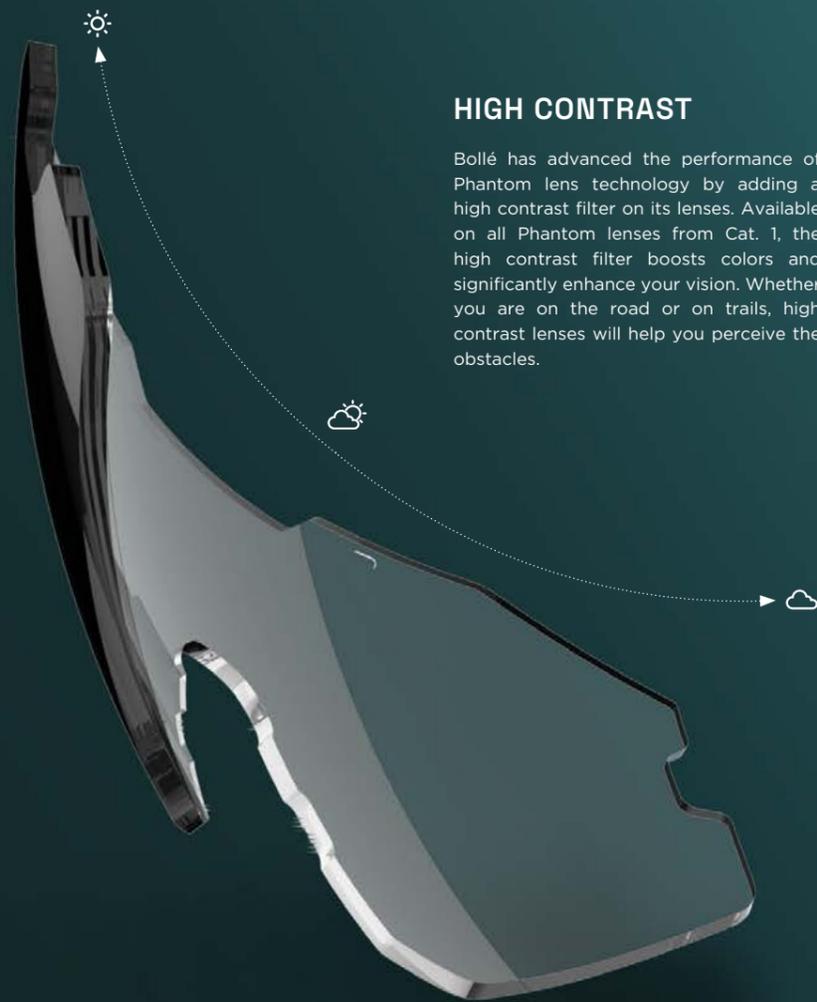

Made with NXT[™] material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT[™] material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

PHOTOCHROMIC PERFORMANCE

Phantom lens technology adapts to any light condition, ensuring precise visual acuity whatever the weather. The lens tint changes with the light from cat.0 to cat.3. Enhanced vision whatever the conditions.

HIGH CONTRAST

Bollé has advanced the performance of Phantom lens technology by adding a high contrast filter on its lenses. Available on all Phantom lenses from Cat. 1, the high contrast filter boosts colors and significantly enhance your vision. Whether you are on the road or on trails, high contrast lenses will help you perceive the obstacles.

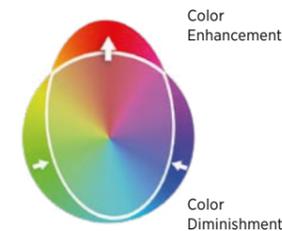

THE FIRST LENS EVER DEVELOPED WITH ARTIFICIAL INTELLIGENCE.

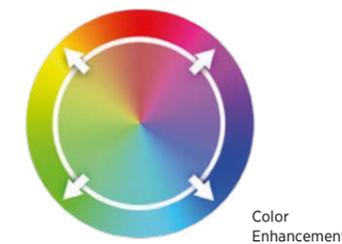

1. Find out which wavelengths to enhance or dampen
2. Design and develop the chemical compounds (pigments) that will absorb the right wavelengths
3. Put together the perfect blend of pigments for the transmission curve we want to achieve

A TRANSPARENT & INTUITIVE WEBSHOP

Since September 2022, a more informative and easier-to-use version of the RX webshop has been made available to opticians, to make the ordering process even smoother. You can enter the prescription details of the frame wearer and the webshop will automatically filter the available frame & lens combinations corresponding to the prescription. A lens thickness calculator also helps you to anticipate the best solution for each wearer.
